obstructio Mensium

Communissima segniori sexus est obstructio mensium et si illa diu durat varia Symptomata necessario post se trahit. ut sunt. 1. Pallor faciei. 2. Lassitudo. 3. Respiratio difficilis 4. tensio hypocondriorum 5. Laesa ventris actio in appetitu et coctione 6. Cardialgia 7. palpitatio cordis 8. dolor capitis. 9. sonitus aurium 10. vomitus quoque sanguinis 11. haemorrhagia locis insuetis 12. pulmonumque imprimis vitia, 13. Vertigo 14. tristitia quae omnia a sanguine restagnante et hinc 15. saepe vapescente deduci possunt.

Causa effectus adscribenda est vel vasis et viis per quas evacuari debent menses vel ipsi sanguini; adeoque vel ante obstructio vasorum uteri vel sanguinis fermentatio deficit, obstruuntur saepe vasa quando eorundem oscula humoribus viscosis pituitosis tartareis seu mucilaginosis quasi obliniuntur, porisque uteri et vasorum densantur, obstructio haec quandoque est naturalis, unde circa annos pubertatis pessime habet, vel acquisita seu alimentis ingestis frigidis et viscidis, lacticiniis, piscibus torrefactis, carne suilla, placentis etc. seu multis internis externisque et aliis.

hinc quoque regurgitat sanguis et hinc illine excitat quam quo denegato mala fiet quamplurima

Sanguinis vero turgescentia deficit 1. quia ipse deficit sanguis sed a natura, unde pro individui sustentatione impedit s. variis aliis casus. v.g. Diuturno gravi morbo febr. ardent. tertian. hydrope etc. Motu nimio, laboribus, vigiliis, luctu, 2. vel quando impurior crassior et viscosior adeoque ad motum et excretionem ineptior est. 3. Vel quando nimis figit et concentratur v.g. per acida et humores acerbos, austeros, stypticos abundantes, seu in tota massa sanguinis seu extra vasa et poros uteri

2

Patet hinc qua ratione de oppilatione seu aperientia et sanguinis fermentatione restituenda.

Notandum vero est R. distinguendas esse a mensium suppressione laborantibus, tum ab antecedentibus in victu, vita genere errorib. obiis variis tum concomitantibus, an certo tempore redeant symptomata, tum an vomitus vertiginis alter addit. 2 non omnibus movendi menses, nam vel iis illis quibus sanguis deficit, quibus inde male est, etc. hinc videndum an adsit abundet et provocari possit. 3. an ei tempore movendi cum natura, hinc ingens differentia quam curandum est, nec negligenda periculum tum si menses eum expectat fuit dura, tempus ordinarium ipsa indicare poterit, sin minus coniunctio ☉ et ☽ seu novilunium est attendendum. 4. an nimis fortibus pellentibus dicunt amat non pelli, hinc nimis calida aliaque fortiora vitanda. 5.
